FOR IMMEDIATE RELEASE  
November 1, 2022

### **Alro Steel Jumbo 24 Inch Tube Laser**

Alro Steel recently added a 24 inch tube laser to our fleet of 12 tube lasers. This new machine is one of the world's largest with capabilities that include cutting up to 24 inch diameter, 16 inch square tube and 18 inch beams. Maximum material length of 50 feet. Tube lasers can cut carbon steel, stainless steel, and aluminum in shapes including angle, channel, beam, round tube, square tube, and rectangular tube. We continue to improve our processing capabilities to meet the growing needs of our customers. This new jumbo 24 inch tube laser is located at Alro Steel in Potterville, Michigan.

Other features of tube laser cutting include:

- Ability to miter cut, tap, notch, pipe joints, slot holes, tabs, and etching
- Reduce the need for sawing, fixturing, milling, drilling, punching, bending, and welding
- Dramatically reduce assembly time
- High-quality cut and parts repeatability

Alro Steel was founded in 1948 by brothers Al and Robert Glick. The company is a distributor of metals, industrial supplies, and engineering plastics. Alro is focused on offering cut-to-size metals and plastics with next day delivery to over 50,000 customers in North America. Alro operates over 75 locations in 15 states and provides a broad inventory of products under the following companies: Alro Steel, Alro Metals, Alro Metals Outlet, Alro Industrial Supply, and Alro Plastics.
