FOR IMMEDIATE RELEASE

Alro Steel Expands in Michigan with New Van Buren Facility

November 11, 2026

Alro Steel is proud to announce the opening of a 524,000-square-foot location in Van Buren, Michigan, expanding the company's footprint and capabilities in the Midwest. Located at 48649 Schooner St. in Belleville, the facility significantly increases Alro's local inventory and processing capacity, providing customers with greater product availability, expanded processing options, and faster shipments.

The facility was acquired and renovated over the past year, transforming the building into a modern Alro metals service center focused on inventory, processing capabilities, and customer service. Van Buren offers an extensive inventory of carbon structural products, including beams, angles, channels, rectangular tubing, and square tubing. Processing capabilities include saw cutting, miter saw cutting, and robotic structural plasma cutting.

The Van Buren investment is part of Alro's ongoing commitment to keeping inventory close to customers and continually expanding the processing services they rely on. The additional capacity strengthens Alro's ability to serve customers throughout the region while supporting continued growth.

Alro Steel was founded in 1948 by brothers Al and Robert Glick in Jackson, Michigan. The company is a distributor of metals and performance plastics. Alro is focused on offering cut-to-size metals and plastics with next-day delivery to over 50,000 customers in North America. Alro operates over 80 locations in 16 states and provides a broad inventory of products under the following companies: Alro Steel, Alro Metals, Alro Metals Outlet, and Alro Plastics.
