## CMM Articulating Arm

The Faro CMM Articulating Arm gives us the ability to measure parts up to 10 foot long with an accuracy of +/- .003". The operator simply traces the part with the computerized head and the data points are uploaded to the laptop and stored. This allows us to easily measure arcs, radius, and curves. The Faro CMM also gives us the ability to reverse engineer a print from almost any sample part.

### CMM Arm Highlights:

- Portable CMM, measures complex parts
- Rapid, reliable measurements digitally stored
- Accuracy of +/- .003" on pieces up to 10 foot long
- Reverse engineer prints from sample parts
- ISO certified company

#### Portability

Measure parts still on the work table

#### Flexibility

Easily measure arcs, curves and radiuses

#### Accuracy

+/- .003" on parts up to 10 foot long
